

Situation Report

Thursday, February 26, 2015 730 PM

National Weather Service Springfield, MO

Winter Hazard Risk:

Hazard Risk:

- Bitter Cold Wind Chills Below Zero Thursday night into Friday morning.
- Potential of Accumulating Winter Precipitation this weekend.

Outlook:

Tonight – The combination of overnight low temperatures in the single digits and northerly winds of 10 to 20 mph will create wind chills in the zero to 10 degrees below zero range from about 10 PM this evening through 10 AM Friday morning.

Saturday – Sunday – An upper level storm system will affect the area from Friday evening through the late weekend.

Closely monitor the forecast for this weekend and early next week for the potential of accumulating winter precipitation

Situation Report

Thursday, February 26, 2015 730 PM

National Weather Service Springfield, MO

Areas and Timing:

- Snow will develop west to east from extreme SE Kansas early Saturday morning to the eastern Ozarks by Saturday afternoon
- As the warmer air moves northward, snow will transition to freezing rain along the MO-AR border Saturday night to the entire area by Sunday morning
- Freezing rain will change to rain as temperatures climb above freezing on Sunday

Accumulations:

- Snow accumulations Saturday are expected to be in the 1-3" range along/north of I-44 with locally 4+" over west central Missouri. A dusting up to 1" possible south of I-44
- Ice accumulations are expected to be less than 0.10" Saturday night into Sunday.
